

Getting Started - Playing the Chromatic Scale

Start the chromatic scale by playing the sixth string open. Then play the notes at frets 1-4 on the sixth string.

Play the notes on the fifth, fourth and third strings in the same way (open and frets 1-4).

Repeat for the second string **but do not play it open**.

Finish the scale by playing the first string open and then on **the first five frets**.

Learn to play the scale backwards when you can play it well forwards.
